

Date: 01/11/24

Not In Attendance: oh219

What's Been Done since the Previous Meeting:

<sw734>:

- . Created an account registration page
- . Added a functioning search bar to the navigation bar in generic layout

<lj330>:

- . Added special meals section to the home page
- . Added a hover over effect to the navigation bar

<mz300>:

- . Created the booking reservations page

<oj54>:

<oh219>:

- . Created the restaurant overview word doc

What's Being Done:

<sw734>:

- . Add model & controller logic to make the account registration page work

<lj330>:

- . Add more features onto the home page

<mz300>:

- . Add model & controller logic to make reservations page work

<oj54>:

- . Needs to begin making the menu(s) which were talked about in previous meetings

<oh219>:

- . Needs to start on the pages talked about the previous week

Further Discussion:

- . After discussions we now have a much better understanding of how the backend works, going to aim to have implemented model & controllers for next week which add some backend functionality to the project
- . Discussed ways lj330 can make some dynamic content for the home page, unsure at the moment on how to do this hopefully have a concrete understanding next meeting after we have made some models & controllers
