

Date: 25/10/24

Not In Attendance:

What's Been Done since the Previous Meeting:

<sw734>:

- . Working on a generic layout to be used across majority of web pages
- . Created the navigation bar & dropdown menus within it
- . Finished the first iteration of the database script which now compiles

<lj330>:

- . Work on the home page, adding features onto it (the html page worked on last week)

<mz300>:

- . Entity relationship diagram is up to date with the current iteration of the db script

<oj54>:

- . Made a design moc for the menu page(s)

<oh219>:

- . Planning out the about us, terms & conditions, contact us & privacy page

What's Being Done:

<sw734>:

- . Continue working on generic layout

<lj330>:

- . Continue adding features to the home page

<mz300>:

- . Move onto creating the reservation system

<oj54>:

- . Begin making menu pages

<oh219>:

- . Implementing the planned pages

Further Discussion:

- . Discussed how to implement the menu pages, undecided on how to load the menu items onto the page. Either have buttons sectioning specific parts of the menu so only parts are rendered at a time, or have the whole menu loaded onto the page at once with sections splitting them up on the page
