

Date: 31/01/25

Not In Attendance: mz300, oj54

What's Been Done since the Previous Meeting:

<sw734>:

- . Created controller functions & the page for changing the user's password
- . Added more error handling / validations regarding authentication, moved away from session storage for more up to date approach
- . Created an account information page for users who are logged in to change any of their info except password
- . Made the logout feature work as intended on the dragon database

<lj330>:

- . Created controller functions & a model for the add to cart feature
- . Added buttons to each food item so you can choose quantity & add item to cart
- . Took away the home icon in navigation bar & replaced it with a cart icon

<mz300>:

- . Making a feature so emails are sent out when a user completes their reservation
- . Made it so contact us via emails works

<oj54>:

- . Working on inventory management system

<oh219>:

- . Created some pages on super admin dashboard with their according models & controllers
- . Created the login for super admin

What's Being Done:

<sw734>:

- . Beginning the documentation, specifically all material linked to the corpus
- . Starting by going back through all the minutes & rewriting them so they are more in depth
- . Needs to go through all prior documentation & refactor & check spelling & grammar
- . Also going to begin index.html page

<lj330>:

- . Creating a checkout page where the total is calculated & where you can proceed to payment

<mz300>:

- . Needs to finish off making the reservation confirmation via email work

<oj54>:

- . Continuing work on the inventory management system

<oh219>:

- . Needs to get super admin working on the dragon db, as developed on local db it does not work for anyone else in the group
- . Also, since implementation of super admin, the admin dashboard & all associated features no longer work
- . Needs fixing so oj54 can add his feature to admin dashboard

Further Discussion:

- . couldn't decide on the plan of action for lj330 implementing his features regarding adding items & checking out

. came to the decision that it is lj330's decision as he it's his feature, so far his way of doing it is working well
