

Technical Report Review:

- . All these lines talk about examining the paper and project...
- . change line 7
- . change line 11
- . change line 25
- . All the lines where 'I' is used, needs changing...
- . change line 72
- . change line 99
- . change line 101
- . change line 118
- . change line 121
- . change line 123
- . change line 124
- . change line 146
- . change line 203, 'my' is used
- . change line 204
- . change line 252
- . change line 295
- . change line 296
- . change line 343
- . change line 346
- . change line 351
- . change line 369
- . change line 372
- . CO600 needs to be changed to COMP6000
- . Around line 30 add some evidence supporting the fact that people struggle to choose where to eat or whether to eat in our out
- . change line 46, misinformation on sprints
- . change line 74? Index html rather than corpus, not too bad
- . change line 82, there 2 spaces at sentence beginning with 'An'
- . change line 88, 'writing the report specifically'
- . line 175, 'marking complete next to people's names for tasks', not too sure if we ended up doing this will have to double check
- . page 199, 'updated' to 'updating'
- . change line 246 doesn't make sense

- . Change the code shown for MODEL, made a change to model so needs updating
- . Testing is incomplete here is what to add to finish testing subsection...
- . Add informal testing
- . Add unit testing
- . Need to add a conclusion at the end of the paper
- . Not enough bibliography, reread through it and add relevant articles / papers / others where possible.
- . Not talked enough about problems faced, talked about the limitations of testing due to time left but not really about anything else.

Conclusion:

So, in conclusion the technical report is pretty good, no punctuation or spelling mistakes after reading through it and a good range of tasks has been covered and good background research. The formatting is up to spec and have made good use of the word limit

Some things to consider and to change are that testing and conclusion need adding. Once these have been added, go back and change some words, example 'I' to something like 'we' is needed as well as some lines talking about examining the project. Got carried away with talking in first person as well as marking this project rather than third person and treating this report as an overview of sorts rather than a marking guide.

Overall, it is solid I just need to go back and fix a few issues which are bullet pointed above
